### *RSI BULLETIN #92-004*

FROM: Daniel C. Ludwig

DATE: March 23, 1992

SUBJECT: Placement of Formulation/Stand Code in Final Test Report

The formulation/stand code is a unique identifier for oil formulations tested using the voluntary CMA Product Approval Code of Practice. For oil formulations being tested using the CMA Product Approval Code of Practice, the formulation/stand number must be placed within the respective "Oil Code", "Client Oil Code", or "Co. Sample No." locations<sup>1</sup> on every page of the final test report. The formulation/stand code must also be displayed on all photographs.

---

<sup>1</sup> The ASTM test procedures use different terms to identify oils.
