### **RSI BULLETIN #R-042**

**FROM:** Daniel C. Ludwig   
**DATE:** February 12, 2002  
**SUBJECT:** Collecting T10 Merit Rating Values

The test pass/fail parameters for Mack T10 were changed between the time that the test was first accepted into the ACC Code of Practice and the time when the new CI-4 performance category was finalized. The Mack T10 test, as it was adopted into the final version of the CI-4 performance category, has a single "Merit Rating" as the pass/fail criterion. The Mack T10 test, as it was originally adopted into the ACC Code of Practice, had several individual pass/fail parameters and did not include a single "Merit Rating".

Test sponsors should advise test laboratories to submit a revised Mack T10 Test Result Form 4 for all tests that were registered with RSI before the single "Merit Rating" criterion was adopted. This will enable RSI to include the "Merit Rating" for all Mack T10 tests on any ACC Monitoring Agency Summary of Scheduled Tests (typically referred to as Data Summary) requested by test sponsors.

Current ASTM report forms which should be submitted to RSI for the Mack T10 are, Forms 4 through 8, 10, 11, 12 and 14.

If you have any questions regarding this bulletin, please contact the RSI offices.
