

RSI BULLETIN #R - O45

SUBJECT: Electronic Delivery of Candidate Data Summaries

This RSI Bulletin announces the introduction of a new service for Test Sponsors: the online, on-demand generation and retrieval of Candidate Data Summaries. A Candidate Data Summary is defined in the American Chemistry Council Code of Practice as, "A summary, generated by the American Chemistry Council (ACC) Monitoring Agency, of all engine tests which were scheduled as part of the program."

In the past, Candidate Data Summaries were secured by authorized individuals within a Test Sponsor company by making a written request to Kim Herald. Once a request was processed, Kim would send the Candidate Data Summary to the requestor by Federal Express. Now, authorized individuals can go online for immediate retrieval of their custom requests, all within a secure environment. The new service is based around Data-Interchange(tm), the secure server for EDT.

RSI will be working with Test Sponsors to familiarize them with the User's Manual and with procedures for accessing the system. Test sponsors can expect further communication within a few days.

Kim Herald at (210) 341-2680 will be your contact if test sponsors have any problems accessing or operating the system.
