

RSI BULLETING #R - 046

SUBJECT: Test Registration for IIIG-A

An ACC ALERT (dated December 1, 2003 re: Sequence IIIG-A Registration) indicated the IIIG-A test would be brought into the Product Approval Code of Practice on December 2, 2003. There are provisions to dual register the same test as both IIIG and IIIG-A, along with provisions to retroactively register IIIG-A tests started from August 12, 2003 through December 1, 2003.

The following instructions describe how to register and submit information to RSI - ACC Monitoring Agency.

- * Use IIIGA as the name of the test on the test registration form.
- * If the test is being registered retroactively, the test registration form should have RETROACTIVE written at the top of the form.
- * Dual registration requires a separate registration form for the IIIG and the IIIGA test.
- * When test results are manually reported to RSI (via fax or postal), submit forms 4-10 of the IIIGA test method.
