RSI BULLETIN #R-051

FROM: Daniel C. Ludwig

DATE: July 11, 2005

SUBJECT: Retroactive and Provisional Engine Test Registration of Heavy-Duty Tests and Submission of Data

Pursuant to the issuance of ACC Alert #9 re this topic, the ACC Monitoring Agency provides the following directives regarding submission of provisional and retroactively provisional registration forms and test results for these heavy-duty engine tests.

- The test codes to be used in registering these provisional heavy-duty tests are as follows:

Test	Code
Mack T-11	T11
Cummins ISM	ISM
Mack T-12	T12
Cummins ISB	ISB
Caterpillar C13	C13

- When a Test Sponsor submits a registration form for retroactive provisional registration of Mack T-11 or Cummins ISM tests, write RETROACTIVE at the top of the form.
- Registration forms for provisional registration of the Mack T-11, Mack T12, Cummins ISM, Cummins ISB (for those tests started on or after July 15, 2005), or CAT C13 (for those tests started on or after September 1, 2005) will be automatically recognized by the Monitoring Agency databases as being provisional registrations—until such time as the test may be accepted into the ACC Code of Practice.
- It is the responsibility of the Test Lab to submit the test results along with the validity statement for retroactively registered tests using Data-Interchange. Most data dictionaries have been revised to include ACC validity declarations. However, if the declarations are not in the data dictionary, the Lab may submit them by fax separate from the data file.
